Supported Features

The ssl module supports the following functions and features:

- Unified handling of different suppliers
 - Comodo SSL Certs
 - Verisign SSL Certs
 - Thawte SSL Certs
 - GeoTrust SSL Certs
- Support for testing environment

Installation

Copy all files from the **install/** subdirectory to your WHMCS installation root directory (**\$YOUR_WHMCS_ROOT**), while keeping the folder structure intact.

E.g.

```
install/modules/servers/ispapissl/ispapissl.php  
=> $YOUR_WHMCS_ROOT/modules/servers/ispapissl/ispapissl.php
```

Configuration

Setup an SSL Certificate product

Within the WHMCS Admin area, go to

Setup => **Products/Services** => **Products/Services**

a) Create a new group

In this example, we will name the new group “SSL Certificates”.

b) Create a new product

Products/Services

Create a New Product

Product Type	Other Product/Service ▾
Product Group	SSL CERTIFICATES ▾
Product Name	Comodo SSL Certificate

Continue »

On the “Details” tab:

Set a Product Description (optional).

Ensure the Welcome Email field is set to "None" as the module sends its own email.

Ensure the Require Domain field is unchecked.

Server Information

You must have a valid "CSR" (Certificate Signing Request) to configure your SSL Certificate. The CSR is an encrypted piece of text that is generated by the web server where the SSL Certificate will be installed. If you do not already have a CSR, you must generate one or ask your web hosting provider to generate one for you. Also please ensure you enter the correct information as it cannot be changed after the SSL Certificate has been issued.
